

PAINTED FINISH

Congratulation on your selection of Koch Cabinets for your home! This finish is quite different from our standard stain finish. Your satisfaction is important to us and we want you to be fully informed about the characteristics of our painted finish.

On wood products, movement is typical due to changes in the climate conditions. This may cause the hairline cracks at the stiles, rails and joints that you will see in a painted finish. Panel shrinkage may also occur in the door panel of your cabinetry. Over time there may be a slight color change in this finish due to exposure to natural and artificial light. You may see some wood grain telegraph thru the paint finish, especially Oak.

Black and Charcoal Blue colors may amplify the natural flaws in the wood that may be hidden by lighter colors.

These items listed above are natural occurrences in the wood and is not considered a warranty issue Koch Cabinets.

I have read the above information and I acknowledge that Koch and Company does not consider the natural wood movement and characteristics of the painted finish I have chosen to be a warranty issue.
