

UNFINISHED CABINETRY

Congratulation on your selection of Koch Cabinets for your home! Unfinished cabinetry is quite different than cabinets with our standard stain/paint finish. Your satisfaction is important to us and we want you to be fully informed about unfinished cabinets.

Unfinished cabinetry needs to be sealed and finished quickly, to reduce the chance of damage before installation. The moisture gain or loss on unfinished cabinetry, exposed to wide humidity changes, can occur very rapidly. This can cause excessive splitting and/or warping. Unfinished cabinetry is more susceptible to staining from liquids, oils and smoke. In many cases the unfinished cabinetry can be ruined, especially if not stored properly.

Consequently, any finish issues will not be covered under warranty and will not be considered a defect or reason for replacement by Koch Cabinets. If cabinets are not finished within two weeks from delivery date all warranty will be void.

I have read the above information and will not hold Koch Cabinets responsible for any finish issues of the unfinished cabinetry I have chosen.
